

Lauren Kimura

Santa Clara, CA | (925) 336-5496 | lkimura@scu.edu | www.linkedin.com/in/lmk2029 | github.com/LaurenKimura

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building production-grade web apps using React, Firebase, and AWS. Co-founded MindGarden, winner of "Best in Play" at Hack For Humanity 2026. Skilled in full-stack development, cloud infrastructure, and rapid prototyping. Seeking a software engineering internship to apply and grow these skills.

TECHNICAL SKILLS

Languages: C, Python 3, TypeScript, JavaScript **Frameworks:** React, React Router, Node.js, Vite
Infrastructure/Cloud: AWS, Firebase **Databases:** Firestore, DynamoDB **Tools:** Git, GitHub
OS: Linux, Windows **ML/Data:** PyTorch, NumPy

EDUCATION

Santa Clara University, Santa Clara, CA, Expected Graduation: 06/2029
Bachelor of Science in Computer Science and Engineering

- Relevant Coursework: Embedded Systems, Discrete Mathematics, Data Structures

Berean Christian High School, Walnut Creek, CA, Graduated: 05/2025

- Activities: All Student Body Vice President, Junior Class President, Business Club President
- Awards: Junior Marshall (top 9% of school), Presidential Service Award (200+ hours of volunteering), President's Education Award (average score of 4 on 10 APs)

PROJECTS

MindGarden

Winner, "Best In Play"—Hack For Humanity 2026

- Architected a full-stack productivity app (React, Vite, Firebase) featuring a gamified Pomodoro timer and real-time Firestore-backed task/rewards system
- Designed an interactive drag-and-drop garden UI with OAuth authentication, driving user engagement through gamification

CardBot

Entrepreneurship Award Winner – SCU Robot Show

- Allowed for scalable personalized card and poster drawing for businesses and individuals, bridging the gap between mass production and personal sentiments
- Optimized the user experience by streamlining image-to-G-code file conversions into actionable robot movements for non-technical users.

Gravitree

- Built a full-stack platform pairing youth volunteers with local elders for in-person support and mentorship
- Developed frontend in React 19, React Router, and Vite; architected backend infrastructure using AWS Amplify Gen 2 (Cognito, AppSync, DynamoDB) in TypeScript

EXPERIENCE

ACM Workshop Coordinator, Santa Clara University 08/2026–Present

- Designed and led a weekly technical curriculum spanning APIs, Databases & SQL, Machine Learning, React.js/React Native, Firebase/Firestore, Flutter mobile development, and Unity game dev
- Developed technical workshop content (slides, live code, demos) and coordinated a team of presenters and TAs

EKG/ML Research Assistant, Santa Clara University 12/2025-05/2026

- Conducted comparative literature analysis of three ML architectures (wavelet-neural networks, transformers, CNNs) for cardiac arrhythmia classification, synthesizing single-lead vs. multi-lead trade-offs
- Built and trained a CNN in PyTorch to classify heartbeats across 5 arrhythmia categories, achieving 97.9% accuracy on 109,468 real ECG signal segments from the MIT-BIH Arrhythmia Database
